

HYDRAULIC BOLT TENSIONING

Hose Reel and Stand for 1500 bar Working Pressure

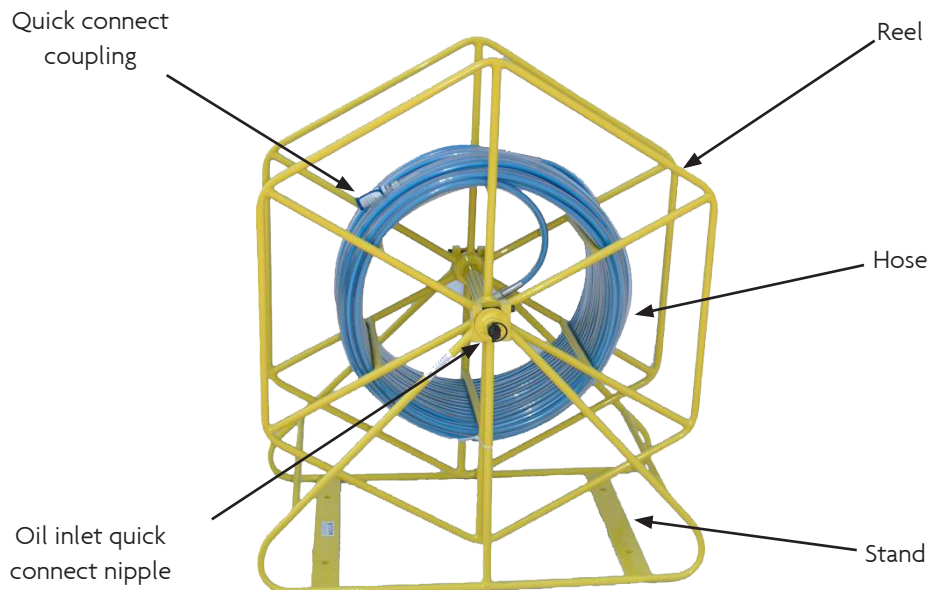

This hand operated hose reel and stand is made from tubular steel finished in yellow paint, epoxy marine powder coat.

The reel is supplied with multiple 30m lengths of high pressure flexible hose to suit the working depth.

The oil feed from the pump is to the end of the reel shaft through a self sealing quick connect nipple. The inner end of the hose is attached to the reel shaft.

The hoses, which have stainless steel ends, are connected together using stainless steel fittings.

The last hose is fitted with a self sealing quick connect coupling. The complete reel is fitted with hoses and subject to pressure test prior to despatch and a test certificate is issued.

Hose Reel and Stand
