

HYDRAULIC BOLT TENSIONING

1000 bar Tee Blocks and other assemblies

These 1000 bar working pressure assemblies are designed for use with all Boltight 1000 bar system tooling, pumps and hose. They are delivered fully assembled with self sealing quick connect couplings for fast and clean operation. The quick connectors have GREEN colour coded dust covers.

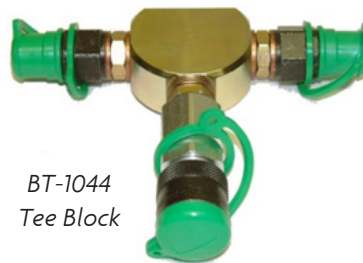

Each assembly is filled with oil and pressure tested prior to despatch. Test certificates are available. All assemblies are marked with serial numbers for identification. Pumps, components and hoses for 1000 bar operation cost less than 1500 bar or higher pressure equipment.

Boltight Ltd also manufactures bolt tensioning equipment, pumps hoses and assemblies for 1500 bar, 2000 bar and 2500 bar operating pressures. Contact us for details.

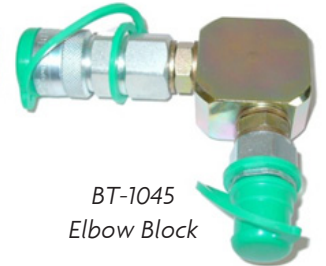

Special assemblies can be made to your specified requirements. Please send details of your requirements for a fast response.
